Sean Isakov

Design Engineer

EXECUTIVE SUMMARY

Design engineer with 4+ years of experience designing and building marketing websites. I take pages from design to launch, mostly in Webflow and also in code, and use AI-driven workflows to move fast.

EXPERIENCE

Webflow Developer & Creative Designer
Freelance
Aug 2026 - Present

Designing and developing websites for clients, mostly in Webflow and also in code, using AI tools to ship better projects, faster.

Webflow Specialist
monday.com
Oct 2025 - Aug 2026

Responsible for collaborating across teams to build and optimize landing pages. Streamlined site architecture to enhance performance and developed a scalable component library, incorporating AI-driven workflows, to empower marketing and design teams with independent page creation.

Creative Designer & Webflow Developer
Loox
May 2023 - Sep 2025

Responsible for managing the company website using Webflow, which involves maintaining, designing, and developing new pages, as well as optimizing overall performance. Also involved in creating designs for marketing and customer success efforts.

Webflow Developer & Web Designer
Freelance
May 2022 - May 2023

Collaborated with various Webflow agencies to provide development expertise, while also independently designing and developing websites for personal clients.
